ABOUT

Welcome to your online fashion runway.

We understand how much you value fashion and how much you appreciate the ease of internet purchasing. The SFRA online shopping app ensures that you don't miss out on a fashionable shopping experience whether you're on the road. SFRA is always available to suit all of your style demands, whether you want to buy for apparel for men and women, shoes, accessories, or even the latest electronics and computer devices.

RECOMMENDATION SYSTEM

ABOUT

Welcome to your online fashion runway.

We understand how much you value fashion and how much you appreciate the ease of internet purchasing. The SFRA online shopping app ensures that you don't miss out on a fashionable shopping experience whether you're on the road. SFRA is always available to suit all of your style demands, whether you want to buy for apparel for men and women, shoes, accessories, or even the latest electronics and computer devices.

RECOMMENDATION SYSTEM

Your Favourite Items have arrived.

In this case, we used a recommendation system to categorise the user's wardrobe and offer the best outfit for a specific occasion based on a recommendation algorithm. The proposed system exhibits its ability to analyse the user's wardrobe from photos, assess the kind and colour of the outfit, and then recommend the most appropriate outfit for the occasion depending on the user's present wardrobe.

CHATBOT[Service]

Your Healer has arrived.

Chatbots may also be used to collect visitor data, which can subsequently be utilised to enhance product recommendations. By having a deep grasp of client queries, requirements, and preferences, you can personalise product pages and improve customer loyalty and affinity. Chatbots may also notify consumers when an item is out of stock, provide acceptable
