1

Define your problem statement
One of the most popular programmes in the e-commerce industry, fashion apps have experienced enormous development. People's demands are always changing, which gives apps opportunities to innovate. An AI software that comprehends the algorithm of a particular application might be very helpful. We are putting in place a chatbot like this, which is fed with information about the application's algorithm and assists the user entirely from identifying their needs to processing payments and starting deliveries.

PROBLEM
